**(Z44.4) DESIGNER'S INFORMATION**

In working on *Module Y3*, I found it convenient for my own use to consolidate all of the annexes from *Modules Y1* and *Y2* into a single place for reference. This made it easier for me to find bits of information without, obviously, having to open different rulebooks at different times. Once I had assembled the annexes, to further ease things I incorporated directly into them any errata or changes that had been made since the original modules went to press. Having all of the Early Years annexes in one place, I then decided to add the one "missing" ship from the set: the conjectural Andorian early dreadnought from *Stellar Shadow Journal #1*.

Once *Module Y3* was completed, I mentioned to Stephen V. Cole that I had created this document and gave him a copy to review. He decided that perhaps it might be something that players who are interested in the Early Years might also find convenient. This led to a number of changes in the original document I had assembled. All of them were made to further

enhance the ease of use of the assembled data. What you are holding is a polished product from a very rough collection of data.

One change was to add empire specific header bars to the Master Ship Charts. Each empire has its own pages (or in some cases simply its own page) with a header on each page that tells you the empire you are looking at. There is an improvement over how things were done in *Module G3* in that the empire rule number is on the outside of each page for easier reference. Further, rather than the Master Ship Chart being at the back of the book, it was incorporated into the book in the same manner as it was in *Module G3*. This was also done with Annexes #3A and #4. Thus all of the annexes are in order.

Other items that were in *Module G3* were also incorporated into *Module YG3* even though, technically, they were not really part of the annexes, these being the "shuttle deck" and "base rotation rate change" entries. Also incorporated was the carrier data for the one and only Early Years carrier.

I extracted the scenarios of the Early Years into their own index, but lacking a page to place them, had to include them in blank spaces on the Master Ship Charts. I also included an extract of the chronological listing for the Early Years scenarios, and updated both to include the scenarios that were in *Module Y3* and *Captain's Log #41*. This is not a perfect solution, but as a compromise it at least does give you a starting point to find the scenarios.

At the request of the proofreaders, the data in Damage Priority Rule Update under Annex #7E was simplified to only include the weapons used in the Early Years of the Alpha Octant; Magellanic Cloud and Omega Octant weapons were deleted.

This product did not start as anything more than something to make doing *Module Y3* easier by putting all of the information in one place and fully integrating it. I hope that it will be of use to all players in the Early Years.

**DEDICATION**

This product is dedicated to the individual augmentees of all services who serve alongside their brethren in the ground forces, and by sharing with them the hazards of the combat zone enable the fighting men to receive the support they need to achieve victory in the ongoing war on terror.
